

Frozen Mustard Greens

TECHNICAL DATA SHEET | COMMERCIAL SPECIFICATION REFERENCE

We supply mustard greens to importers and food manufacturers as mustard-green leaves and tender stems, cut as agreed. We agree processing status, application fit and defect limits, then align packing, records and frozen delivery with the approved order.

Revision 1 | 16 October 2026 | GreenLand-food

We agree final acceptance limits, sampling methods, intended use and packing before supply. This product sheet is not a certificate of analysis or a batch test report.

01 Physical and sensory

Parameter	Specification / agreement	Verification
Identity	Mustard greens should not be interchanged with turnip greens or pak choi.	Approved sample and label
Form and color	We confirm leaf-to-stem ratio, species or market type, cut width and acceptable yellowing.	Frozen and prepared sample

02 Physicochemical and residues

Parameter	Specification / agreement	Verification
Residue scope	Set by destination and buyer agreement	Applicable lot report if ordered
Other chemistry	Agree only relevant parameters	Agreed method and report

03 Microbiological

Parameter	Specification / agreement	Verification
Criteria	Set by destination and intended use	Lot sampling and method if ordered
Process relation	Match washing and any blanching record to the approved lot; a fresh-grade reference is only an inspection vocabulary.	Process record and release review

04 Freezing and cold chain

Parameter	Specification / agreement	Verification
Freezing route	Confirm actual SKU process	Production record
Storage	Approved specification; minus 18 C as industry reference	Storage and shipment record

05 Pack and shelf life

Parameter	Specification / agreement	Verification
Net weight and case	Order-specific agreement	Pack check
Shelf life	Approved label and specification only	Date-code and version check

06 Process

Parameter	Specification / agreement	Verification
Preparation	We confirm leaf-to-stem ratio, species or market type, cut width and acceptable yellowing.	Approved process sheet
Heat treatment	Match washing and any blanching record to the approved lot; a fresh-grade reference is only an inspection vocabulary.	Lot-specific evidence where relevant

07 Ingredients additives and allergens

Parameter	Specification / agreement	Verification
Ingredients	Confirm actual single or mixed ingredient declaration	Final artwork
Additives and allergens	Confirm actual formulation and destination rules	Supplier declaration and artwork

08 Defects and foreign matter

Parameter	Specification / agreement	Verification
Visual defects	coarse stems, field grit, weed admixture, insect damage, and uneven bitterness across lots	Agreed sample and inspection
Foreign matter	Agree reject criteria and detection plan	Inspection and detector records if used

09 Materials and label

Parameter	Specification / agreement	Verification
Food-contact pack	Agree material and suitability	Packaging specification
Label	Product name, lot, dates and use instruction	Approved artwork proof

10 Detection and traceability

Parameter	Specification / agreement	Verification
Lot boundary	Define production and packing lots	Traceability mapping
Release evidence	Agree tests and inspection scope	Lot file review
